

Have yourself a Knebworth Merry Christmas!

When I came across this box set, of the legendary Stones 76 Knebworth show, by chance on the net, it felt liked all my Christmases came at once at an amazingly reasonable fifty quid! This surely can't be true....

The set boasts no less than eight CDs with recordings of the day including the full Stones set as well as exciting other acts going on before them such as Hot Tuna, Lynyrd Skynyrd and 10CC. As a bonus, you get the full New Barbarians set on CD from 1979 and a digital Led Zep '79 souvenir with an interview and slides from their show. There are three DVDs with exclusive footage in, up and around the shows (incl. the Stones) and a 330 page book telling the history of the 1969-1976 Bath & Knebworth festivals through the eyes of organiser Freddy Bannister (as also stated on the silver presentation box). Furthermore, there is a festival T-shirt for you to wear, a reproduction of the '76 tour programme to flick through, a repro of the original flyer and ticket, 12 fine glossy Stones pics of the show to frame and a smart poster advertising the legendary event to pin on your wall.

This is quite simply the ultimate fan package anyone can hope for - a box set worthy of celebrating Knebworth 1976 in all its splendour! And we're stressing *fan* here as, even though you should not expect HD DVD or remastered CD sound quality, the analogue sounds and vision within this box set is more than adequate to take you back to that magical time back in '76. And for those who look beyond the Stones there's some truly amazing music-making to be found in the support slots, which at times even have a better sound quality! In the independent recordings ratings the set probably ranges a score of *good* to *very good* in overall sound and vision quality these days but I most definitely would add elements of excellence to that in terms of authenticity - and that's because it comes straight from the source.

This set has been lovingly compiled by Freddy Bannister himself and his family and it is a beautiful dedication to this man's legacy with 1976 no doubt being the crown on his work when he managed to stage the Stones.

So get one for Christmas, hey ... buy some for your friends & family or buy one as an investment. Whatever you do; simply enjoy this fantastic set! But hurry....this ultimate little bargain won't last (it can't be Christmas forever!)
